Cisco Wireless:

See what your customers are missing.

Why Cisco Wireless?

20 YEARS
of wireless technology innovation

GARTNER MAGIC QUADRANT LEADER
wireless/wired LAN access infrastructure

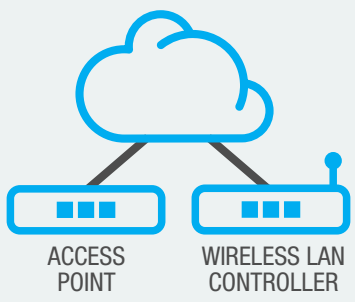
47%
of wireless AP market share (Q1, 2017)

1.5 BILLION
spent quarterly on R&D

3 types of wireless solutions to serve your customers:

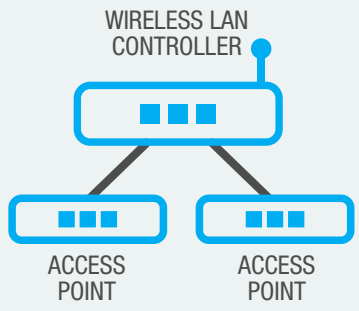
On-premises, appliance-based:

Can expand to thousands of APs and communicate with other access points for consistent coverage.



On-premises, appliance-free:

Use Cisco's Mobility Express to join multiple APs together and build smaller networks.



Cloud-based:

Control any number of access points in any location around the world.

The right solution for the right customer.

Whether a small office or a large enterprise, Cisco wireless offerings provide a wider portfolio to serve a variety of customers.

Cisco Mobility Express:

For customers who want an easy-to-install solution with enterprise features and no plans to move to the cloud.

Features:

- Deployed on premises
- No IT staff required
- Remote site-by-site management
- Scales to 25 access points
- Perpetual licenses

Cisco Meraki Wireless:

For customers who want cloud-based services and simple, intuitive management features.

Features:

- Web dashboard management
- Simple, all-inclusive subscription licensing
- Easily scales to thousands of access points
- Quick and seamless guest access
- Integrated location analytics
